

## **FOREWORD**

I have pleasure in presenting the Twelfth annual issue of 'SIA STATISTICS'. This volume contains an analysis of Industrial Investment Intentions for the year 2009-10, including statewise and industrywise break-up of investment proposals. A note on the growth of industries in the non-SSI sector along with a comparative picture of production details of 209 key industries in the non-SSI sector during 2008-2009 and 2009-2010 also forms part of this publication. Detailed list of various industrial approvals and Press Notes issued during the year 2009 have also been included.

I am sure the publication will be useful for policy makers as well as for those pursuing academic interests and others.
